

A scatter plot showing 150 data points from the Iris dataset, colored by species. The x-axis is labeled 'First Column' and ranges from 4.5 to 8.0. The y-axis is unlabeled but ranges from 4.5 to 8.0. The legend indicates three species: Setosa (green squares), Versicolor (blue triangles), and Virginica (red circles). The Setosa species is clustered on the left side of the plot (First Column values between 4.5 and 5.5). The Versicolor species is clustered in the middle (First Column values between 5.5 and 6.5). The Virginica species is clustered on the right side (First Column values between 6.5 and 8.0). Each data point is labeled with a number from 1 to 150.
